TUBE TRIAL PACKS

Do you want to get started using 2D Data-Matrix coded tubes but first want to test if the Micronic tubes, caps or racks are suitable for your application? Micronic offers Tube Trial Packs that give you the opportunity to purchase just one unit of racked 0.30ml, 0.40ml, 0.50ml, 0.75ml, 0.80ml, 1.10ml or 1.40ml tubes (10 racks), and enough Screw Caps (IG) or Push Caps (TPE Capclusters) for capping all 10 racks. The Micronic products are produced, assembled and certified as RNase, DNase and Endotoxin (pyrogen) free.

2D DATA-MATRIX CODED TUBES

The 2D Data-Matrix coded tubes and Code Readers of Micronic are used by researchers worldwide to guarantee the traceability of valuable samples during the sample storage process. The unique 2D code of each tube can be scanned to identify a sample, its coordinates within a storage rack, the particular freezer and the location of the rack in the freezer. In addition to providing reliable long-term sample identification, the high quality Micronic labware ensures that the integrity of samples is preserved at ultra-low temperatures over extended periods of time.

Micronic offers a comprehensive range of 2D Data-Matrix coded tubes. Precision manufactured from ultra-pure grade Polypropylene in a certified Class 7 clean room production environment, the tubes resist many organic solvents (DMSO, methanol, dichloromethane), may be autoclaved clean and can be gamma irradiated without loss of product performance. Manufactured to the industry leading strict tolerances, the tube-to-tube consistency of Micronic labware maximizes operational uptime when used in combination with automated systems.
